

# OMNINO

The 'omnino' logo is written in a bold, black, lowercase, sans-serif font. A curved line arches over the letters 'n' and 'o'.

Stylish, compact and manageable, the Viglen Omnino takes integrated all-in-one computing to the next level.

Viglen personal computers are  
manufactured by XMA in the UK

The Viglen Omnino is an integrated all-in-one PC from XMA created with the benefit of three decades of design knowledge. Drawing on our own experience as well as listening closely to our customers' requirements, the Viglen Omnino combines key vectors of performance, flexibility, style, manageability and value, resulting in a versatile computer that's equally suited to single-desk and whole organisation deployments.

## Performance

Unlike other all-in-one PCs which use power-limited processors, the Viglen Omnino is based on proven technology from Viglen and Intel and benefits from the power of Intel® Core™ processors. The result is a scalable PC which can be deployed for multiple roles.

## Usable

We've created the Omnino to be an effective desktop PC on everybody's desk. The integrated design features a 23.8" IPS display which is as bright as it is power efficient without the need to increase the physical size of the chassis. Features such as the built-in webcam and integrated multimedia and WiFi make the Omnino as easy for deployment as it is for your users

## Value

The versatility of the Omnino and its large display gives you access to tomorrow's computing, today. Our fully customisable design means you can specify exactly the components you need without paying for those you don't.

## Multimedia

The Omnino takes desktop multimedia to the next level with HD audio built into every system and dedicated stereo speakers providing a much clearer audio image than a single internal speaker. Intel HD graphics takes care of the visuals effortlessly and an accessible HDMI port means a second display can be enabled in moments.

## Style

The integrated chassis of the Viglen Omnino means your IT looks as good as it performs without the need for traditional box PCs. A range of motherboards, including Intel® vPro, enable models to promote the key advantages of managed computing. You'll enjoy enhanced performance, manageability and security, without compromising the style and versatility of the Viglen Omnino.

## Flexibility

The Omnino is based on industry standard thin mini ITX motherboards, giving the widest possible choice of processors and storage as well as integrated multimedia and connectivity.

Select your preferred motherboard to optimise configuration for budget, manageability, performance or lifecycle without having to deploy different all-in-one PCs to meet your requirements.

## Convenience

Every aspect of the Viglen Omnino has been informed by feedback from our customers with features such as accessible ports and controllers a priority. The power supply is built in to the chassis, so there is no inconvenient external power transformer and we've provided a choice of no fewer than four deployment options to maximise its multi-role versatility: fixed-height stand, kickstand, height-adjustable stand and VESA mounting.

## Secure

Your IT investment is important and keeping it secure is a primary concern. The Omnino includes a Kensington-style security locking point and options for a desktop locking pillar as well as Viglen's flexible asset tagging and security services which mean that you can protect your investment without compromising access.

## Environment

An all-in-one PC offers a highly attractive environmentally-aware computing option, because the base unit and monitor operate from a single power supply, reducing the overall power consumption. The Omnino goes a step further with T-series Intel® Core™ processors and an LED display, both designed to minimise power consumption. When combined with existing hardware and software power efficiency measures including Energy Star 5 certification, the Omnino becomes an exemplary environmentally-aware PC.

## Omnino Specification

- **Chassis**  
Integrated form factor with 100mm VESA mounting
- **Processor**  
Choice of Intel Core i3, i5 and i7, Pentium® and Celeron®
- **Motherboard**  
Choice of Viglen thin mini-ITX boards
- **Operating System**  
Windows® 10, Windows 8 / 8.1, Windows® 7 Professional
- **Memory**  
Up to 32GB DDR4 or DDR3
- **Hard Drive**  
Range of HDD and SSD options
- **Graphics**  
Integrated Intel® HD graphics
- **Networking**  
Integrated Gigabit Ethernet  
802.11b/g/n WiFi (factory-fit option)
- **Optical Drive**  
Optional Slim DVD Writer Drive
- **Audio**  
Integrated multi-channel HD audio
- **Input**  
105-key USB keyboard and optical mouse with optional upgrades
- **Webcam**  
Integrated webcam in monitor bezel
- **Power Supply Unit**  
Internal 120W power
- **Security**  
Standard: Kensington locking point  
Optional: security pillar, asset tagging and security marking
- **Display**  
23.8 inches  
Native resolution: 1,920 x 1,080  
Brightness: 300cd/m<sup>2</sup>  
Contrast ratio: 1000:1  
Response Time: 5ms
- **Certification**  
Energy Star 6.1
- **Dimensions [W x H x D]**  
560 x 420 x 80mm
