# Deploy to Home

In our current climate, it is more important than ever that staff and students have access to technology for remote teaching and learning. Our 'Deploy to Home' solutions support the deployment and adoption of iPad, ensuring teaching and learning can continue outside of the classroom.
With iPad at home, students can access their work, engage and collaborate with their teachers and fellow students and receive feedback. Technology can ensure that education can continue uncompromised, and it's easier to achieve than you may think.

XMA have adapted a number of it's usual services, to bring to you our 'Deploy to Home' solutions. This means technology can be received, set-up and managed all from the comfort of your home.

How are we able to do this?

Configuration
Our configuration centres across the UK allow us to prepare iPads for easy home set-up. We can help to connect to home networks and also supply WiFi hotspots and data packages.

Deployment
XMA have UK wide logistic capabilities, enabling us to ship devices to individual locations with ease. Our couriers offer contact free delivery, shipping orders quickly and safely.

Support
Devices will have supporting documentation to help parents connect to their home internet or Wifi Hotspot respectively. XMA are also able to support any hardware queries via our Apple Service Desk.

Managed iPad Service
With Apple School Manager and Jamf, we can automate the set-up of your devices as well as the distribution of applications and content. Safeguarding solutions will be put in place, ensuring student devices are protected whilst away from the classroom and out of school hours.

Development
Our community of Apple Professional Learning Specialists at XMA can support the SLT, teachers and parents with education at home through online training sessions and resources. This can all be delivered remotely using our Remote APL service.

Finance
We'll work with you to agree the right method of financing your technology. This solution can be financed with a single up front payment or monthly instalments. Getting technology into the hands of your teachers and learners has never been so easy.

Technology & Services Solutions

Device & Accessories Bundle:

- iPad 10.2" 32GB 7th Gen
- Apple Pencil or Logitech Crayon
- STM DUX Case
- Wi-Fi Hotspot and Data Plan

Services:

- iPad management licenses
- Management console set-up
- Pre-configuration of iPads
- Delivery to multiple locations
- Supporting documentation to set-up at home
- CPD for SLT and Teachers

Express Managed iPad Service

Our Express Managed iPad solution supports schools and colleges in deploying managed devices quickly, in instances where remote deployment is required - such as during the COVID-19 pandemic.

The configuration of management solutions including Apple Schools Manager and Jamf, will allow users a best-in-class deployment experience, with immediate access to the applications and resources they need, as soon as they open the box. All devices can be set-up with secure access to content, also considering relevant school policies and safeguarding requirements when deploying technology outside of the classroom.
