Connect education

With hundreds, or even thousands of devices connecting to a single network, across large buildings and campuses, education institutions depend on quality broadband to deliver cutting-edge experiences.

Any solution has to be reliable, powerful, secure, and capable of handling anything the day could have in store. That's where specialist options, built with education in mind, come into their own.

INTRODUCING EXA NETWORKS

For almost 20 years, Exa Networks has been providing UK education organisations with bespoke networking solutions they can rely on.

From consultation through to installation and beyond, Exa aims to give teachers the best possible platform, and students the ideal start to their future learning experiences.

PART OF THE RECOMMENDED BY XMA RANGE

Recommended by XMA is a range of products designed to fit the needs of education. Covering everything from devices to software, and now including Exa's network solutions, the range helps educators deliver outstanding learning experiences, even on tight budgets.

The Exa difference

Choosing Exa Networks brings multiple advantages across key areas of concern. Here are a few.

SAFEGUARDING

From content filters to cloud-based monitoring, it's easy to keep track of where devices are, and what students are searching on your network. Exa Networks works with a company called Securus, a leading name in monitoring solutions, while its in-house SurfProtect solution helps protect young people from malicious and inappropriate content, as well as grooming threats.

SECURITY

With a range of firewall options available, as well as proactive measures to protect your network from hackers and other threats, you can be confident your school won't be held to ransom, or classes brought to a grinding halt.

Exa's FortiGate solution can help. It's remotely managed by Exa itself to ensure it's always up to date, and your students are protected.

INTELLIGENCE

Prioritise devices, remove deadspots and identify areas where your network can improve. With Exa Networks' range of routers, points and other smart equipment, your broadband connection can be as strong and stable as possible.

CONNECTIVITY

School broadband is only as effective as its download and upload speeds, and its ability to handle multiple connections. With plenty of options to choose from, scaling up from 80Mbps FTTC to scorching 1Gbps, with speeds guaranteed for many options, you can be sure you'll find the right solution for you.

Support at every step

Your institution is unique, and you should be treated as such. Don't just settle for an off-the-shelf package and no support – get the right setup for you, and the assistance you deserve.

BUILD BESPOKE NETWORKS

Whether you're spread across a campus and multiple buildings, or one large space, your network requirements should be bespoke. Exa Networks will work to find the best solution for you, one that'll work for years to come.

STAY PROTECTED, STAY CONNECTED

Keeping track of your network can be hard work without the right support. Exa's Protect & Connect solution provides a fully managed service, complete with connectivity support, safeguarding of students and teachers and cybersecurity measures, so you can focus on teaching, not your Wi-Fi.

THE SUPPORT YOU NEED

Alongside your XMA Account Manager, you'll have access to Exa Networks' award-winning team of technical engineers, and customer service managers. They'll be on hand seven days a week to answer your questions, assist your management decisions and make sure you're always well looked after.

Why choose XMA for Exa Networks?

XMA's history of working with education is long and highly successful. We've helped thousands of UK schools, colleges and universities find the perfect IT solution for them, within budget and on-time.

But we do more than just make the sale and move on. Our team is there to help at every stage. From helping you identify what your ideal solution looks like, to being on the end of the phone after the system is up and running, whenever you need us, we'll be there.

CHOOSING EXA NETWORKS THE KEY POINTS

- Get the bandwidth you paid for

- Enjoy support seven days a week

- Get the right solution for your scale and budget

- Never pay a premium per pupil
