

## Put more power behind flexible working

with AMD Ryzen™ PRO 5000 Series mobile processors

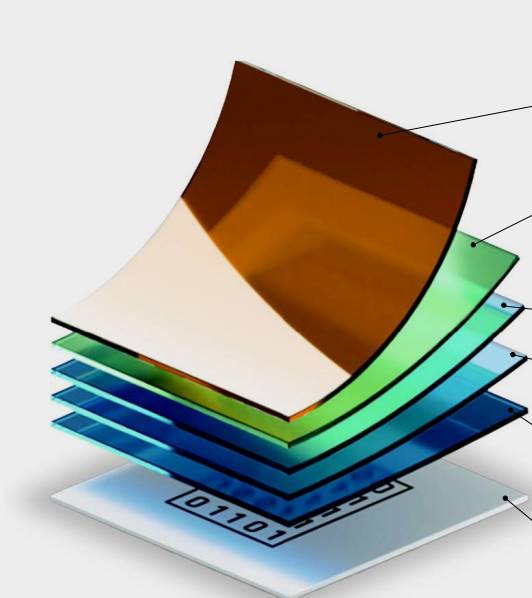

The rise of flexible working in enterprise, education, and the public sector has driven an even greater need to protect and empower your people – wherever they are. For many, this is now every day, not just every once in a while. It means you have to make sure their equipment is up to the job.

Through our partnership with AMD, you can deliver the security, manageability, and productivity to put more power behind flexible working – with AMD Ryzen™ PRO 5000 Series mobile processors.

### Secure your people

Protect your data wherever it (or your employee) goes. AMD PRO security builds layer on layer of defence at the silicon, OS, and platform levels.

**OEM security features**

**Windows Security**

Secure core PC

Hardware Enforced Stack Protection

**AMD Memory Guard**

**AMD Secure Processor**

FIPS 140-3 Certification

**AMD "Zen 3" architecture**

AMD Shadow Stack

**Your data**

In fact, the features of the AMD Ryzen™ PRO 5000 Series make it the most modern security system.

Protect against control-flow attacks with the robust security approach of AMD Shadow Stack

Secure Windows PCs with deep integration between Microsoft and OEM

Meet the FIPS 140-3 government encryption standard for validating the security of cryptographic modules

Like every processor from AMD, you'll find a rich manageability feature set that simplifies deployment, imaging, and management – and fits right into your existing infrastructure.

**Keep your IT ecosystem secure**

**Support your modern end-point tools**

**Reduce PC administration and maintenance costs**

**Empower your mobile workforce**

And with long-term support, AMD PRO Business Ready means reliability from the moment you deploy.

**18 months** of planned software stability

**24 months** of planned availability

Enterprise-grade **quality assurance**

## Manage them at every step

Like every processor from AMD, you'll find a rich manageability feature set that simplifies deployment, imaging, and management – and fits right into your existing infrastructure.

### Accelerate workplace applications

with an advanced 7nm "Zen 3" architecture for processor performance leadership

### Get up to 20.5 hours of battery life

on a single charge

### Multitask at speed with 81%

higher multi-thread performance than the competition

## A partner to protect and empower you

Put more power behind flexible working in your organisation with XMA and AMD. Our experience in enterprise, education, and the public sector means we're uniquely positioned to deliver highly personalised support. Add the standout benefits of power-efficiency and competitive pricing from AMD processors and you've got just the qualities you need to put more power behind flexible working.

Let's have an outcome-led discussion to see how AMD Ryzen™ PRO 5000 Series mobile processors can be a part of your outcome-based solution.
