

**We'll do the tech -
you do the policing**

Lenovo

Lenovo recommends
Windows 11 Pro for business

The digital dilemma

You know better than anyone the difficulties facing the UK's police forces. Ever-tightening budgets combined with squeezed resources means fewer officers are having to do more with less.

A vital issue involves the unseen work that goes on behind the scenes, like collating and sharing evidence from data. Outdated legacy systems don't help and a high recruitment turnover means there's a constant need for re-education.

XMA can offer a solution that provides the latest Lenovo and AMD hardware, as well as support and training.

How to boost efficiency

Tests run using the Lenovo ThinkStation P620, powered by the AMD Ryzen™ Threadripper™ PRO processor, showed some dramatic results.

Overall, the Lenovo ThinkStation P620, powered by AMD, **boosted efficiency by**

recovering data from all devices.¹

A new PC on the beat

As a Lenovo Platinum Partner, XMA is an expert in all things Lenovo. We understand the Lenovo ThinkStation P620, powered by AMD, could be the new recruit on your squad. Just four deployed in a station frees enough time to take an officer out of the back room and into the community. Plus, Windows 11 means productivity, collaboration, and built-in security right out of the box.

Talk to us about what the **Lenovo ThinkStation P620, powered by AMD, could do for your police force.**

One size doesn't fit all

There are 43 forces in the UK – a single solution for all of them won't do. XMA offers a flexible, partnership approach.
