

# Easy, compliant procurement: Next-level public sector devices with HP and XMA

The Technology Procurement and Associated Services (TePAS) framework streamlines the purchasing process for public sector organisations. And 2023's TePAS 2 makes it even easier to purchase the IT your organisation needs – including the latest Intel®-powered HP devices and solutions – all with just one, fully compliant contract.

TePAS 2 also enables you to align your IT provision with your organisation's wider goals – including its sustainability targets – with its:

- Rapid, seamless, and efficient procurement process
- Competitive pricing and proactive supply chain assurances
- End-to-end device lifecycle management (buy, upgrade, maintain and recycle)

# Featured TePAS 2 products: HP for public sector
