

# PHILIPS

## Evolve the everyday in your business with **USB-C Philips docking solutions**

Today's hybrid working practices demand that desks are set up to be both streamlined and secure. But reconciling your ESG initiatives with the need to modernise can be a challenge in a fast-paced business environment.

Philips take a committed approach to responsible innovation. Energy-saving Philips Business Line monitors make it possible to champion positive change for the wellbeing – and productivity – of your people.

# Achieving all-round efficiency with Philips displays for work and play

## Transform the hybrid working experience for everyone

These displays are all about the comfort, ease, and convenience of the user. Simplify and unify the hybrid working experience with multi-device compatibility and a predictable workstation set-up for every user. Empower employees to move confidently from desk to desk and location to location.

## Deliver a new level of power savings

With the Business Line range, workspaces that look and feel more efficient can also use less power. USB-C Philips docking technology aligns with your ESG goal initiatives by helping to cut your energy consumption and costs with intelligent energy-saving features.

## Refuse to compromise on performance and productivity

Reduce mess – and stress – and improve workplace wellbeing. With intelligent Business Line design, you enjoy crystal-clear visuals with extra-wide viewing angles, immersive sound and seamless collaboration, alongside smart cable management and simple one-cable USB-C Connection. Perfect for a fast-paced hybrid working environment.

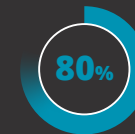

### Spotlight:

## Smart Philips Business Line energy-saving functionality

**LightSensor** technology adjusts brightness to light conditions for user comfort with minimal power usage.

**Zero Power Switch** cuts AC power completely to help reduce carbon emissions.

**PowerSensor** uses harmless infrared detection to automatically reduce monitor brightness whenever users step away, cutting energy costs by up to **80%**<sup>1</sup>.

energy costs cut

Smart energy-saving device features and SmartErgoBase for maximum comfort at work

# Monitors that do more

Modernising your IT – sustainably – takes a trusted vendor that delivers immersive, professional-grade performance and functionality alongside all-round excellence.

## 49" Philips displays

**32:9 SuperWide screen designed to replace multiscreen setups**

**49B2U5900CH/00**

32:9 SuperWide 49" screen with 5120 x 1440 resolution is designed to replace multiscreen setups for a massive wide view.

It's like having two 27" 16:9 Quad HD displays side by side. SuperWide monitors offer the screen area of dual monitors without the complicated setup.

## 40" Philips displays

**UltraWide LCD monitor with USB-C docking**

**40B1U5601H/00**

- Integrated 5 MP webcam
- UltraWide Quad HD
- High Dynamic Range (HDR)

Simple set-up, crystal clear images and seamless communication

## 34" Philips displays

**Curved UltraWide display with USB-C dock**

**34B1U5600CH/00**

- Built-in 5 MP Webcam and noise cancelling mic
- Ultra-high resolution Philips MultiView display
- High-density pixel count
- Windows Hello™ facial recognition

Easy one-cable set-up, wide viewing angles, enhanced speed and productivity and awesome images

## Why XMA for Philips?

**At XMA, it's not about what we can do.  
It's what we can do for you.**

Our specialist teams understand specific vertical and customer challenges. So we're ideally placed to help you achieve the smartest and most sustainable outcomes for your business.

When you choose Philips Business Line USB-C Philips docking solutions from XMA, you can have confidence that your new devices are designed and built by a trusted vendor whose ESG commitments, purpose, and practices align with our own.

You can also rest assured that your approach to modernisation is more sustainable with Waste Electrical and Electronic Equipment (WEEE) Regulation-compliant disposal of legacy devices.

## Doing business responsibly and sustainably with Philips

### Philips monitors feature:

- Innovative and super-energy-efficient design
- Fully recyclable packaging
- RoHS (Restriction of Hazardous Substances Directive) compliance
- Mercury-free LED backlit displays and PVC/BFR-free housing

"The circular economy approach delivered by XMA proves that what's good for the environment can also have positive business value. We have the potential to reinvest the funds from the sale of our used and recycled equipment in... technology that boosts our productivity and enables us to better serve our staff and residents."

**Toni Green, End-user Computing Manager,  
London Borough of Enfield**
