Introduction

Microsoft 365 Copilot marks a major stride in intelligent productivity. Harnessing AI capabilities, Copilot streamlines workflows, boosts collaboration, and empowers users to excel.

Maximising Microsoft 365 Copilot benefits while ensuring security and smooth adoption demands a carefully planned strategy. This services helps uncover key insights to ensure readiness for Microsoft 365 Copilot including:

- The organisational value of Microsoft 365 Copilot.
- Ensuring data is secure and compliant while using Microsoft 365 Copilot.
- Empowering your organisation to use M365 Copilot confidently and effectively.

87% of leaders believe AI will give their organisation a competitive edge. Are you M365 Copilot ready?

Methodology

Microsoft 365 Copilot Readiness service enables your organisation to understand the value of Microsoft 365 Copilot with use persona mapping to maximise benefits. The output of the service provides recommendations for your journey to adopting Microsoft 365 Copilot.

▶ Discover

The purpose of the initial workshop is to understand the value of Copilot, including:

- Identify which users and workloads maximise benefits.
- Licensing cost analysis and TCO modelling.
- Your current readiness for Microsoft 365 Copilot.

▶ Define

During subsequent workshop(s) our specialists will work with you to:

- Tenant assessment and technical pre-requisite validation.
- Understand your specific data compliance and security requirements.
- Understand your user profiles and users for a new way of working.

▶ Recommend

The output of this activity is a concise roadmap that includes:

- Best practice for managing data lifecycle, access and security while using Copilot.
- Enabling Copilot in your Microsoft 365 apps and services.
- Change management strategy to drive awareness, engagement and adoption of Copilot.
