

The real cost of running old devices

Your device estate is either an asset or a liability.

The risk is real

- 43% of UK businesses reported a cyber breach or attack in the last 12 months.¹
- UK organisations lose roughly 98 hours per year—about 12 working days per person—to slow and failing technology.²
- Cyber Essentials treats unsupported operating systems as an automatic failure, threatening supply-chain and contract requirements.

What's at stake

Unsupported Windows 10 endpoints, unpatched since October 2025, are the primary weak points attackers probe first.

Running out-of-support systems can lead to denied cyber insurance claims, meaning a breach on an unsupported estate may not be covered. Extended Security Updates only rent time at an escalating annual cost, while ageing devices drive rising support tickets and emergency replacements at unplanned prices.

Featured XMA Solutions

XMA partners with vendors such as Microsoft to deliver secure, high-performance Copilot+ PCs.

- **XMA Hybrid Worker Solution:** A mobile Copilot+ device providing all-day battery life and secure access for field-based teams.
- **XMA Power User Solution:** A robust Copilot+ PC designed for intense productivity tasks, processing AI workloads locally to control cloud costs.

The case for refresh

- Hard numbers: Organisations report a 62% drop in security incidents on Windows 11 Pro devices³. IT teams using Copilot+ PCs project a 30% reduction in device management time and up to 50% lower help-desk effort.⁴
- Productivity: Devices are up to 2x faster in office productivity tasks versus ageing PCs⁵, feature all-day battery life for hybrid and field-based teams, and require fewer disruptive restarts.
- Security as standard: TPM 2.0, Pluton, and Secured-core protection come by default, strengthening your Cyber Essentials position and cyber insurance posture in one move.
- TCO control: Planned, framework-priced refreshes, leasing options, and trade-in recycling beat reactive replacement. On-device AI reduces reliance on variable cloud compute costs.

Why XMA?

XMA delivers extensive corporate sector experience, backed by flexible leasing and financial services options. We provide comprehensive configuration, build, and deployment services, alongside a circular economy managed service for your outgoing estate.
