

SAMSUNG

Future-Ready Devices for Modern Work

Equip your workforce with secure,
AI-ready computing from Samsung
and XMA

Galaxy AI ✨

Copilot+PC

The Modern Workplace is Evolving

Today's workforce expects technology to work as hard as they do. Employees require devices that support collaboration from any location, without disruption.

Simultaneously, IT teams need hardware that is straightforward to deploy, manage, and secure at scale. Furthermore, organisations are increasingly looking to AI to improve productivity, automate everyday tasks, and find new, more efficient ways of working. Meeting these demands requires a strategic approach to endpoint devices.

Why Samsung?

When evaluating hardware for the modern workforce, Samsung computing devices provide a reliable foundation based on three key pillars:

Built for Business:

Designed to withstand the rigours of daily work while projecting a professional image.

AI-driven Productivity:

Integrating smart tools that shortcut repetitive tasks and improve output.

Easy to Secure, Easy to Deploy:

Featuring built-in security and streamlined deployment options to reduce the burden on IT departments.

Samsung Chromebook (4GB)

For organisations prioritising cloud-first working and browser-based productivity, the 4GB Samsung Chromebook offers a highly accessible and cost-effective solution.

Powered by ChromeOS, it provides fast boot times, built-in security, and immediate access to cloud-based applications like Google Workspace, helping employees stay productive whether they're in the office, working remotely, or on the go.

The 4GB model is specifically designed for straightforward, web-centric workflows, ensuring employees have the resources they need for everyday tasks without over-provisioning hardware. For IT teams, deployment is simplified through centralised cloud management, reducing setup time and ongoing maintenance.

Galaxy Book6 Enterprise Edition

An everyday essential, made for business

The laptop you take with you everyday defines your productivity and your style. The Galaxy Book6 Enterprise Edition helps you score top marks in both.

With a super-stylish contemporary look, a business-exclusive Mocha Grey chassis colour and a design that's all about comfort, it's the all-rounder AI PC that packs in more powerful, business-centric tools than the Galaxy Book6.

It also offers an array of on-device AI tools to take your productivity even further - like the incredibly versatile Microsoft Copilot+ PC tools¹ and Galaxy AI solutions². The Enterprise Edition-exclusive IR camera enables fast, reliable biometric security, and both firmware- and hardware-based security add truly resilient layers of protection.

Luxury that won't cost a fortune

Crafted from durable aluminium, the Galaxy Book6 Enterprise Edition stands up to bumps and scrapes. A three-year warranty as standard adds to your peace of mind.³ The 14" model weighs as little as 1.45 kg and measures just 14.9 mm thin, offering visual harmony and ergonomic comfort. The one-tone keyboard with numpad improves usability further.⁴

Intelligence and power for the AI age

Devices come pre-installed with Windows Pro Clean OS, with nothing that's not absolutely necessary, meaning faster set-up and no need for IT to manually re-image devices. It puts super smarts at your fingertips, allowing you to use Galaxy AI's natural-language tools to find lost files⁵ and easily organise your thinking⁶. Thanks to Link to Windows, you can also enjoy the best of your Galaxy smartphone's AI capabilities on your PC.⁷

1. Microsoft account and internet connection required.

2. Subject to change. Internet connection required for search.

3. Excludes accidental damage. T&Cs apply.

4. Numpad only available on 16" model.

5. Subject to change. Internet connection required for search.

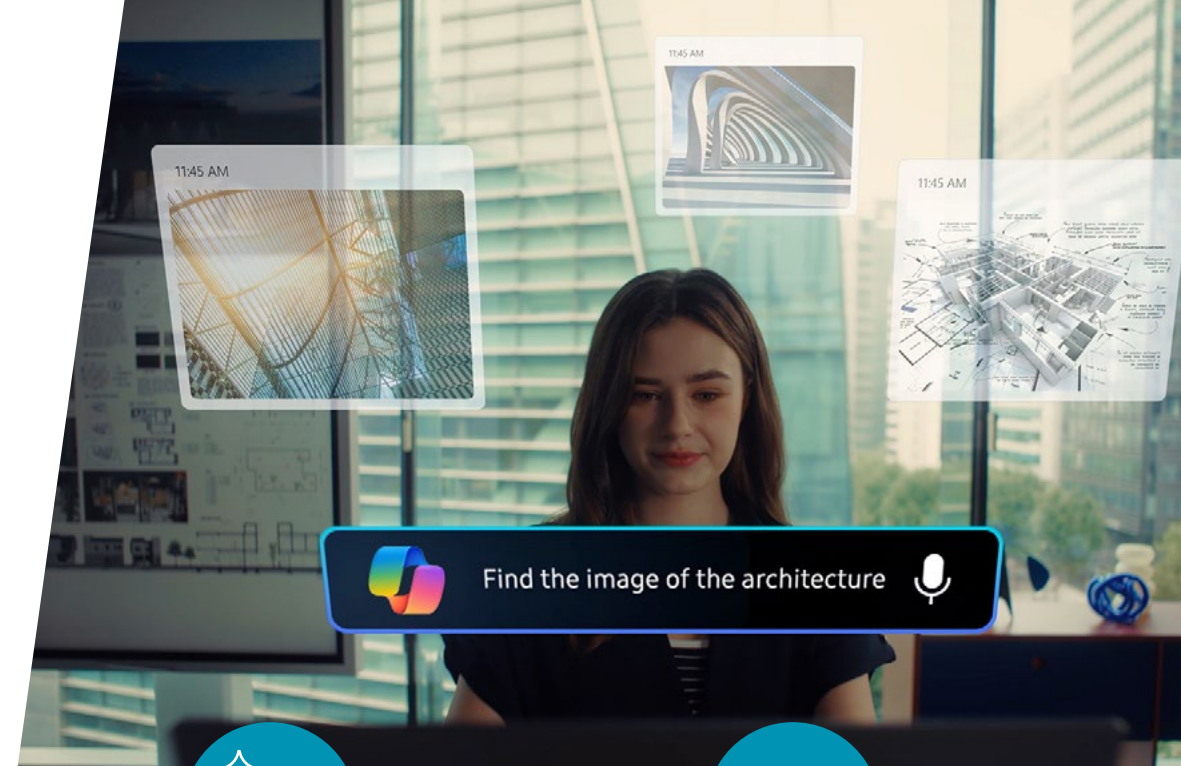

6. Samsung account and internet connection required.

7. Galaxy smartphone with One UI 7.0 and Galaxy AI required.

Microsoft and Samsung account required.

Work Smarter with AI – Copilot and Galaxy AI

Today, being the best professional you can be means using the best technology available to you. Push your devices to their maximum capability to improve your output. Galaxy AI is a major step forward, built to help you maximise productivity without increasing your workload. It helps you shortcut repetitive tasks and amplifies your work.

Live Translate

Let AI automatically translate your speech into one of 13 languages, removing language barriers.¹

Chat Assist

Provides context-sensitive suggestions for more effective writing, ensuring you always strike the right tone.

Note Assist

Formats, summarises, translates, and categorises your notes automatically.

Transcript Assist²

Automatically creates minutes of your meetings and differentiates between speakers.

Circle to Search with Google³

Discover more about anything on your screen by simply circling or highlighting it.

Galaxy AI 

 Copilot+PC

1. Available in 13 languages from launch. Accuracy of results is not guaranteed.

2. Service availability may vary by language. Accuracy of results is not guaranteed.

3. Actual UX/UI may differ. Requires network connection. Results may vary depending on visual matches. Accessible on any app that does not block screenshots.

SAMSUNG

XMA unlocks AI

At XMA, exceptional isn't just a goal, it's our foundation. We reliably integrate Samsung Galaxy AI into your existing infrastructure, leaving you free to focus on what matters most - growth. Our specialist teams, deeply versed in your industry's unique demands, are architects of smarter, more sustainable business outcomes.
