

**SAMSUNG**

# Samsung Galaxy A Series Enterprise Edition

Configured for Business.  
Managed by XMA.

# The Complexity of Managing Business Mobiles

Managing a fleet of mobile devices presents significant operational challenges. Your organisation is likely dealing with:

- **Security Risks:** Protecting sensitive corporate and public data against increasingly sophisticated threats.
- **Complex Management:** The time and cost required to configure, deploy, and maintain hundreds or thousands of devices.
- **Unpredictable Costs:** Unexpected repair bills and the high capital expenditure of device refreshes.
- **User Downtime:** The loss of productivity when a device fails and a replacement isn't immediately available.

# The Solution:

## Samsung Knox Suite

Samsung Knox Suite is a comprehensive collection of security, deployment and device management tools designed for business. Combined with Samsung Galaxy Enterprise Edition devices, it helps organisations secure, deploy and manage mobile technology more effectively throughout its lifecycle.

More than just a business smartphone, Samsung Galaxy Enterprise Edition with Knox Suite delivers a complete mobility solution built around three key pillars:

### **Maintain Productivity**

Keep your teams working without disruption.

### **Defend Against Threats**

Secure your critical data.

### **Simplify Management**

Reduce the burden on your IT Team.

# Maintain Productivity

Downtime costs money and affects service delivery. Enterprise Edition includes services that keep your people operational.

## 3-Year Extended Warranty<sup>1</sup>

Provides coverage for the typical enterprise device usage period, which now approaches three years. This offers budget predictability and protects your investment for longer than a standard consumer warranty.

## Next-Business-Day Doorstep Replacement<sup>2</sup>

If a device fails under warranty, a replacement is dispatched for the next business day to minimise productivity loss. This service reduces the need for your organisation to hold a costly inventory of spare "buffer" stock.

## 2-Year Product Lifecycle<sup>3</sup>

Guarantees the same device model will be available for two years from its global launch. This is critical for large organisations, as it allows for proper device testing and consistent, phased deployments without mixing hardware models.

<sup>1</sup> With Samsung Gold Stock. Terms apply.

<sup>2</sup> Next Business Day (NBD) available with valid warranty claim, if booked with the Samsung Business Service Centre (BSC) before 2pm on a business day. Doorstep Exchange with Samsung gold stock. Excludes accidental damage. T&Cs apply.

<sup>3</sup> The two-year product life cycle starts from the global launching date.

# Defend Against Threats

Data security is a non-negotiable requirement for corporate and public sector organisations.

## Hardware-Level Security Built-in

Samsung Knox provides multi-layered, defence-grade security at both the hardware and software levels. Knox Vault uses tamper-resistant hardware (EAL5+ certified<sup>1</sup>) to isolate and protect your most critical data, such as PINs, passwords, and biometric information.

## Long-Term Software Protection

Devices receive up to 8 years of security and maintenance releases<sup>2</sup> from their global launch date, ensuring they are protected against evolving cyber threats for their entire operational life.

## Centralised Security Control

Included in Knox Suite<sup>3</sup>, Knox E-FOTA<sup>4</sup> gives your IT team granular control over OS updates. You can test new firmware before deployment and force updates on a schedule across your entire fleet to ensure all devices are patched and compliant.

<sup>1</sup> EAL: Evaluation Assurance Level (CC, Common Criteria) Security features or hardware/software architecture of Samsung Knox Vault on Samsung Galaxy A series smartphones may differ from those on Samsung Galaxy flagship devices including S series, Z series, S FE series smartphones and Tab S series tablets launched from 2021 onwards.

<sup>2</sup> Based on 2025 Security Maintenance Release Policy for all Galaxy devices.

<sup>3</sup> Valid Samsung Knox Account required. One year of Knox Suite is included in first purchase of Knox Suite for two or three years.

<sup>4</sup> Requires additional licence as part of Knox Suite. Valid Knox account required.

# Simplify Mobile Management

Reduce the time your IT team spends on device administration, allowing them to focus on strategic projects.

## Streamlined Deployment with Knox Suite<sup>1</sup>

Knox Mobile Enrollment allows you to automatically enroll hundreds of devices into your management system right out of the box, saving significant IT time.

## Comprehensive Remote Control

Knox Manage lets you remotely enforce security policies and manage device settings. Knox Remote Support<sup>2</sup> enables your helpdesk to troubleshoot a user's device without it needing to be sent in.

## Actionable Insights

Knox Asset Intelligence provides a cloud-based dashboard with data on device battery health, application usage, and connectivity, helping you to proactively manage your fleet.

## Expert Setup at No Extra Cost

QuickStart Go provides support from Samsung to help configure and deploy Knox Suite correctly, ensuring your team can use these tools effectively from day one.

<sup>1</sup> Valid Samsung Knox Account required. One year of Knox Suite is included in first purchase of Knox Suite for two or three years

<sup>2</sup> Must be purchased as part of Knox Suite plan.

## Equip every role with the right technology

Galaxy A Series

Galaxy A17 5G  
& A17 4G

### **A new standard in business essentials**

The Samsung Galaxy A17 5G and A17 4G redefine entry-level devices, delivering an elevated experience with enhanced reliability and cutting-edge display quality.

As your gateway into the A Series range and the business-ready benefits of Enterprise Edition, these devices are designed to meet the demands of modern professionals.

Galaxy A27  
5G

### **Seamless, everyday intelligence**

The Samsung Galaxy A27 5G Enterprise Edition is the intelligent companion for every workday. With a classy, refined design, boosted performance and intuitive AI tools, it's even easier—and more cost-efficient—to keep teams connected.

With slimmer bezels and a new Infinity-O display, you get much more bang for your buck in terms of screen-space. And with a glossy glass finish, front and back, you'll get a premium, polished experience for less. This slick design doesn't sacrifice comfort either, as optimised button placement makes your grip feel solid.

Galaxy A37  
5G

### **Intelligence on hand at all times**

The Samsung Galaxy A37 5G Enterprise Edition is a powerful performer that comes packed with smart tools, advanced capabilities and unparalleled security—all while still delivering exceptional value.

Where this intelligent phone really shines is with its array of essential AI tools—from Google Gemini to the latest Circle to Search with Google, plus AI call captions, transcripts and real-time translations. These tools give your teams everything they need to work with added smarts, find answers fast and keep their concentration—even in the busiest environment or on the move.

Galaxy A57  
5G

### **Reliably intelligent**

The Samsung Galaxy A57 5G Enterprise Edition is the slimmest A Series phone yet. But don't let its sleek frame fool you, it's a powerful performer that comes packed with smart tools, advanced capabilities and unparalleled security—all while still delivering exceptional value.

Give your teams the power to succeed with the mighty new Exynos 1680 processor, and the new One UI 8.5—which provides a smooth performance and more than enough power to tackle a busy day of meetings, brainstorming and getting things done.

# From Product to a Fully Managed Service

Samsung provides the tools. XMA delivers the complete solution.

## Expert Consultation

We don't just sell devices. Our specialists work with you to understand your specific operational needs, security policies, and user requirements to design a mobile strategy that fits your organisation.

## Device Management as a Service (DMaaS)

We take the management burden from you. Our DMaaS offering includes:

### Knox Mobile Enrolment Provisioning

Devices shipped directly to users, pre-configured with the correct applications and security policies.

### Ongoing Management

Specialists who can support with your device estate.

### Reporting & Analytics

Bespoke reports available to support your organisation's needs.

# Flexible Support and Financial Models

## **UK-Based Break-Fix Services**

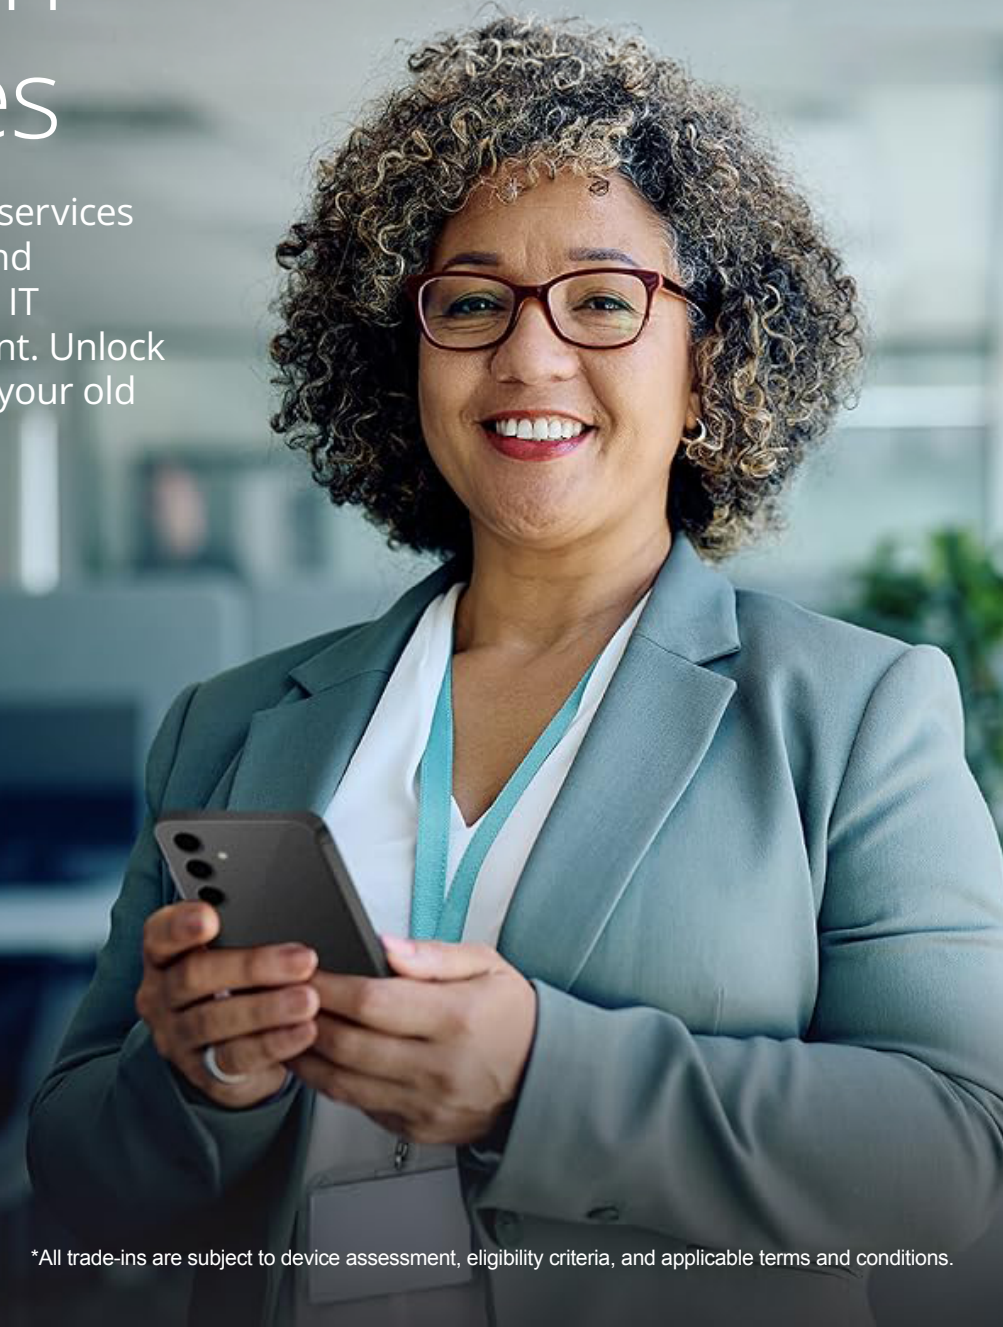

We go beyond the standard warranty. XMA provides comprehensive break-fix support, including our own repair centres and logistics network, to handle repairs for accidental damage and out-of-warranty issues, further reducing downtime.

## **IT Leasing and Finance**

Move from a capital expenditure (CapEx) model to a predictable operating expenditure (OpEx) model. Our flexible leasing options bundle hardware, software, and management services into a simple, per-user, per-month cost. This simplifies budgeting and makes best-in-class technology more accessible.

# Trade-In Services

Our device trade-in services help reduce costs and support sustainable IT lifecycle management. Unlock the hidden value of your old devices with XMA.\*

\*All trade-ins are subject to device assessment, eligibility criteria, and applicable terms and conditions.

# The Complete Solution

By combining Samsung's business-ready hardware and services with XMA's expert consultation, management, and support, you get a complete mobile solution.

We handle the technology, so you can focus on running your organisation.

SAMSUNG

# Next Steps

Let's discuss how we can build a secure and productive mobile environment for your organisation.
