Put your endpoint management into hyperdrive

Go further with XMA and Omnissa Workspace ONE® UEM

Managing a growing number of devices doesn't have to drain your IT resources or complicate your security. XMA and Omnissa help you consolidate your endpoint management tools to reduce costs and free up your staff for more critical initiatives.

Overcoming the endpoint challenge

As the number of endpoints in an organization's environment continues to grow, IT teams are struggling to achieve consistent, effective management.

70%

of end users interact with
four or more devices

68%

of organizations have deployed
**more than ten management
and security tools**

Endpoint expansion has led to
significant security challenges.

ONLY
10%

of organisations
**actively monitor
all of their
endpoints²**

Boost efficiencies with Workspace ONE

Manage any endpoint on any operating system for any stage of device lifecycle management — from anywhere.

Optimise IT to save time and money:

- Automate the onboarding process over the air.
- Manage and secure devices and apps faster, with fewer point solutions.
- Make data-driven decisions and automate repetitive IT processes.

Secure devices and achieve better compliance

- Enable certificate lifecycle management to renew certificates automatically or manually.
- Remediate security deficiencies before granting access to resources.
- Connect securely to corporate resources via a per-app tunnel with zero trust architecture.

Improve employee experience and productivity

- Boost productivity with consistent experiences and access for all apps across all devices.
- Enhance security, speed, and ease of use with integrated single sign-on (SSO).
- Leverage built-in per-app tunneling to secure sessions - even with apps behind your firewall.

It's like rocket fuel for endpoint management

Workspace ONE UEM is built on a modern architecture to deliver modern management for modern enterprises.

Scalable

Improve performance more than **10X** with a modern architecture that grows with the enterprise — no matter the number of resources, users, or devices.

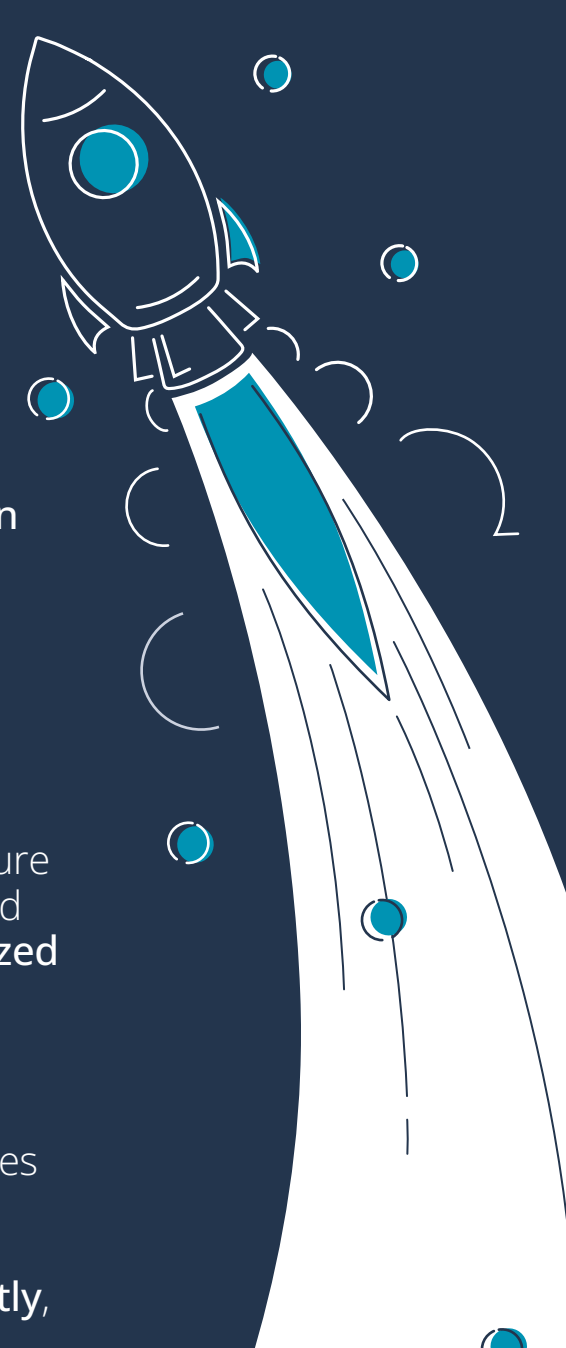

Flexible

Leverage a multitenancy architecture that enables flexible groupings and assignments, providing a **customized user experience for everyone**.

Fast

Enroll, manage, and monitor devices faster with a microservice-based architecture that enables you to **update profiles and apps instantly**, instead of over hours or days.

Data-driven insights and out-of-this-world automations

Take off with innovations across the Omnissa Platform to do more with Workspace ONE.

Automate complex workflows with orchestration.

Harness machine learning and AI for advanced analytics and reporting.

Access ready-made dashboards, scripts, and workflows.

The future of endpoint management is here

Stop juggling multiple point solutions and start making data-driven decisions. **Contact XMA today** to design a scalable, automated architecture tailored to your organisation's needs.
